

## Ban Bio-Weapons

What if a terror attack is used to **stop elections or keep voters away** from Democratic precincts in a large tie-breaking state?

Would a **right wing zealot use germs** to distort the democratic process?

**Its been done before.** One month after 9/11, someone with access to U.S. labs mailed anthrax to the Democratic senators who were holding up **passage of the Patriot Act**, which was then quickly passed.

## Shut down the labs!

The U.S. is developing **genetically-modified diseases** in violation of the 1972 Convention on Biological Weapons. Some **have no vaccine or cure**. These super-germs are contained in government and private labs which have already **had accidental and deliberate pathogen releases** into the environment, causing sickness and death.

**Help us stop this new biological arms race before its too late.**
